

## **ARTISTS, SCHOLARS, SCIENTISTS, AND ENTREPRENEURS OF TOMORROW (ASSET) PROGRAM DESCRIPTION**

The Artists, Scholars, Scientists, and Entrepreneurs of Tomorrow (ASSET) program recruits a student cohort of roughly 10 members with a wide range of academic and career aspirations. Students pursue intensive individual projects and together they identify and discuss connections across disciplinary boundaries, emphasizing a deepening understanding of how to create constructive dialogue across those boundaries.

While many students in the program will be those who intend to pursue graduate education at some point, some participants may intend to pursue a professional degree or immediately embark upon a career after graduation.

### **The ASSET Program includes three distinct experiences:**

**1. Winter Seminar**—the seminar is a 1-hour weekly course in which students reflect on their career aspirations, learn about graduate study, and prepare for the summer research project. The seminar is non-credit but a required part of the ASSET program. It will likely be virtual in 2023.

**2. Summer Work**—students are expected to work 35/hours week for 10 weeks of research or creative work. ASSET scholars receive \$3,300 to support themselves, and the funding can be used to defray the costs associated with the summer project, including research materials and living expenses.

**3. Summer Cohort Gatherings**—in-person required meetings throughout the summer, to provide a space for community and conversation, and keep projects on track.

### **It also includes some end-of project requirements:**

**1. End product:** Students are required to submit some sort of "end product" at the end of the summer. This may be a research paper, a survey analysis following data collection, a creative piece of writing, a literature review, etc. The product may be "in progress," but something content-related must be submitted to the Vovis Center and your faculty mentor before Fall Term 2023 begins.

**2. Presentation of Work:** ASSET scholars are required to submit a brief **report** summarizing the project, methods, results, etc and what the student gained from being part of the ASSET program. A brief **video** outlining the same is also required, as well as participation in the HORIZONS Student Celebration the following spring.

### **Scholars/projects are selected based on the following criteria:**

1. Quality of the application in terms of the written project proposal and personal statement.
2. Feasibility of the project in terms of its potential to be completed within a 10-week summer timeline.
3. Preparedness to pursue independent research/scholarship/creative work in terms of academic potential and experience.
4. Motivation and rationale for pursuing desired career path (ie how well the student explains why they wish to pursue their desired career path).
5. Overall fit with the purpose and intent of the ASSET fellowship program.
