		<i>ART 280W This course will explore the visual language and historical evolution of collage, a pivotal creative method at the center of both early modern, and post-modern artistic expression. Through a series of guided projects, and discussions, this course will strive to further develop both creative decision-making and critical thinking. Projects will promote material, visual, and conceptual innovation from found and appropriated materials, language, and imagery. Through the process, the craft and care with which objects are constructed will be no less a part of the overall success of the work than the soundness of its conceptual foundation. This class will consider many contemporary examples of collage work and link them to historical moments in the development of collage. Prereq: two Studio Art courses or permission of the instructor.</i>

<i>NEUR 245 Biomedical scientists work in a collaborative environment performing experiments in the lab. This course will immerse students in that environment. Students will learn what questions can be answered using tissue culture techniques while learning the techniques themselves that can then be widely applied to other research projects. Students will learn how to grow cells in culture, perform an experiment, and analyze and present the data obtained. By the end of the course, students should feel comfortable and confident in the lab and ready to apply their new technical skills and knowledge to other research questions. Prereq: sophomore standing with at least one laboratory course in Biology or Chemistry.</i>

<i>PHIL 295CC Transhumanism addresses a range of issues connected with the technological enhancement of humans, made possible by developments in medicine, genetics, molecular biology, nanotechnology, and computer science. These developments appear to place human evolution within human choice, opening up the possibility of the human-made human rather than the human as an artifice of nature (or God). Starting with an analysis of what transhumanism is, this course will consider whether and how humans might be biologically and cognitively altered, as well as issues of social justice regarding the proposed changes.</i>

<i>THTR 223 A higher level exploration of the fields of Scenic and Lighting Design as visual storytelling. Through the carefully considered manipulation of the elements of design and the principles of composition, advanced projects will engage the interstices between Scenic and Lighting Design and their reliance on one another to create space and form. These projects will build upon experience gained in THTR 222: Scenic and Lighting Design I in both magnitude and complexity. Students will further develop a considered personal design process and aesthetic through the theoretical and practical experience gained from each project. Includes the completion, presentation, and critique of multiple original design projects. Prereq: THTR 121 and THTR 222 or permission of the instructor.</i>

THTR 386G-1		STAGING THE NATION	1.0	—	D. Nichols	2	MWF
<i>THTR 386G As the U.S. enters a presidential election season, we are consistently presented with competing narratives of nation, nationalism, and national identity. Staging the Nation explores how (historically and currently) the theatre articulates and questions notions of national identity and presents alternative narratives of nation and nationalism. Postcolonial writer Homi Bhabha describes the process of Nation and Narration, in which national identity is never fixed but always in process as it is narrated by its people. Staging the Nation extends that process of narration to the stage, where artists literally stage identity through dramatic and theatrical works articulating ideas of national identity and nationhood within the U.S.A. and its intersections with other nations in the context of state-funded National Theatres.</i>
