This form is necessary to give the Sustainability Committee an idea of what project you are interested in undertaking to better the sustainability of our college. After this form is given to our committee we will invite you to our weekly meeting in order to have a conversation together about the specifics of your project. This conversation will be an opportunity for us to offer not only fund recommendations but also advice to help make your proposed project a reality. It is our mission to not only help fund projects but also provide assistance with projects that do not require monetary support. Please feel free to attend our weekly meetings on Tuesdays at 6:30 in the Library’s Reference Room.

1. Please describe the project you would like to pursue. In this description clearly illustrate the project itself as well as the rationale for why the Student Sustainability Fund should be invested in such a project.
2. Please explain the benefits of your project in the context of its direct relation to sustainability and the Knox College Community.

3. Please illustrate the time and resources needed to make a fully realized version of your proposed project a successful reality.

4. Please provide a line-itemed summary of the funds you would need to cover your proposed project.

Please give this form to: Nora McGinn, either in person, or email her at nmcginn@knox.edu, or in her K-Box 1611, or call her at 978.210.7689.
